

CASE STUDY – DISTRIBUTION COMPANY FOR 27 000 RESTAURANTS

Problems :

- Invoices are faxed or emailed manually
 - Error-prone
- No visibility on interactions with the actors / stakeholders
- Different applications used by different partners
- EDI, XML, Excel, DB2 on AS400, JD Edwards
- An implementation software package valued at over \$ 500 000

Cast Iron Solution:

- Easy communication between JD Edwards and other applications, data sources, etc. ...
- Visibility into all transactions (quantity / volume / frequency)
- Complete application interoperability in 5 days
- ROI in less than 6 months
- Robustness: No failure since the initial deployment (over 9 months)

Data sources :

- cXML
- EDI
- Email
- Excel
- Flat-files
- HTTP
- JD Edwards

Performed integrations :

- B2B
- Partners' data
